Abstract

Conflux Professional 1.6 is a set of technical back-end updates, performance optimizations and code reorganization designed to enable support for modern operating system and base component versions, such as the database engine. This document describes the major changes made to the Conflux Professional for this release.

Release: Conflux 1.6.3

Bug fixes

- Fixed issue introduced in 1.6.2 regarding downloading files and e-mail attachments

Release: Conflux 1.6.2

Bug fixes

- Removed erroneous demo-server restrictions from the code
- Fixed document copy/paste error
- Fixed moving documents created by others to "My Documents" making them invisible
- Fixed invalid error message generated when an (invalid) URL does not match a Conflux module

Release: Conflux 1.6.1

Operating System Support

Conflux Professional 1.6.1 enables support for RHEL/CentOS/Scientific Linux 6, Fedora 15/16, Debian 6 and Ubuntu 10.04 LTS. Support for earlier operating systems, such as SUSE 9.x, RHEL 3 and Fedora Core 1-2 has been discontinued.

Base Component Support

Conflux Professional 1.6.1 enables or discontinues support for the following base components:

- Python versions 2.6 and 2.7 are now supported. Support for Python versions earlier than 2.6 has been discontinued;
- Support for mod_python has been discontinued. Conflux Professional now uses WSGI to interface with the web server (see the following item);
- mod_wsgi versions 3.2 and 3.3 (recommended) are now supported.
- PostgreSQL versions 9.0 and 9.1 are now supported. Support for PostgreSQL versions earlier than 8.0 has been discontinued. Use of PostgreSQL versions earlier than 8.4 is strongly discouraged.
- Psycopg2 is now used to access the database. Psycopg (version 1.x) is no longer used or supported.

In the first public releases, the following functionality is not available. Support for portions of listed (specifically, WebDAV) functionality is intended to be restored in improved form in later releases.

- XMLRPC interfaces
- WebDAV support
- Internal Conflux instant messaging system
